

Towards world class athletes...

EcoFlex ties up with Herculano Sports Surfaces B.V., a Dutch company, certified by IAAF (International Association of Athletics Federations).

Herculano polyurethane systems are backed by over 25 years of experience in manufacturing synthetic flooring systems.

Through this strategic tie-up EcoFlex seeks to create a better market in India, thereby helping Indian athletes to excel in their sport worldwide.

The Product

Herculano durable sports floors are used worldwide and cater for outdoor running tracks as well as indoor stadiums.

Outdoor. Outstanding.

Herculano SR Sprint sports surfaces

Herculano SR Sprint sports surfaces are seamless, cushioned, spike resistant tracks with point-elastic properties.

The high performance seamless surface of the Herculano SR Sprint system is an in-situ applied rubber base layer covered with coloured EPDM broadcasted elastomeric wear layer. Herculano SR Sprint is water impermeable, spike resistant, and therefore ideal for running tracks and multi-purpose sport facilities.

If you want your sportspersons to get quality practice...

... then **Herculano SR National** could be more cost-effective option. The only thing that differentiates it from the Herculano SR Sprint surface is its top layer, which is covered with a spray applied structural coating. The Herculano SR National system is water permeable, spike resistant, and therefore ideal for practice running tracks.

Top quality, seamless, cushioned, spike resistant tracks with point-elastic properties; ideal for running tracks, multi-purpose sport facilities and school playgrounds.

Seamless, cushioned, spike resistant tracks with point-elastic properties; ideal for running tracks and school playgrounds.

Multi-sports. Multi-function.

Apart from a quality surface that fosters the playing of different sports, many a time one also wishes to organise other events in the same arena. Like exhibitions. Examinations. Concerts. Conferences. Where do you go, when you want the best of both worlds?

Herculan MF sports surfaces

Herculan MF sports floors are seamless from wall to wall, cushioned, **Multi Functional** polyurethane floors with point-elastic properties.

The high performance seamless surface of the Herculan MF system is non-porous, therefore hygienic and easy to clean. And apart from providing optimum slide and slip resistance, the high tensile strength, tear strength and elasticity of the Herculan EX 800 wear layer makes this surface as robust as they come.

What this means is that Herculan MF is just the right choice for indoor sports surface needs.

These sports include:

- ◆ Handball
- ◆ Indoor Soccer
- ◆ Badminton
- ◆ Gymnastics
- ◆ Volleyball
- ◆ Basketball
- ◆ Korfbal
- ◆ Indoor Hockey

Not just that, this tough and durable sports floor can also be used for other activities: exhibitions, concerts, conferences, and more!

Top quality multifunctional point-elastic floors suitable for all traditional indoor sports; can also be used for exhibitions, concerts, examinations, and more.

Herculan: because quality in sports begins at ground level

Herculan Sports Surfaces B.V. uses only the best quality raw material and high-tech production methods, guaranteeing excellence and finesse. What's more, help and advice from Herculan's skilled technicians is always available to identify the optimum system for both standard and customised requirements. And the best part? All Herculan Sports Floors are easy to maintain and can be resurfaced when required.
